My Pirate Ship

My Pirate Ship would be comfortable. I think that a pirate ship might be uncomfortable if you had to stay on it for many months like a real pirate would. So I would put a comfy couch and a KING sized bed in the captain's quarters. Also, I think that I might get bored after being on a pirate ship for a very long voyage so I think that I would definitely need to put a big screen TV into the top of my bunk so I wouldn't miss my favorite shows. I think it's important that the pirate ship has sooo many sails because if it didn't then the ship must not sail well and might stop somewhere and not reach its destination. I think that pirates must have had a hard time trying to remember all the different jobs they were supposed to do on every part of the ship.
